Note: before you can get access to the argus-monitor-2.0.11-build-1304.zip the compiler and all required libs. of argus-monitor-2.0.11-build-1304 we need to compile and install argus-monitor. so the first thing you will need to do is to download and install the GNU Emacs compiler so you can compile and install argus-monitor. 2. Then download the following source code and place it in the directory where you are going to work on. 3. Then in the directory where you have placed the source code above you need to cd to the directory and type the command to make the argus-monitor: ./configure make make install Once you have the argus-monitor in place you will have to configure the Emacs, download the dependencies and use GNU patch. 4. Install the GNU Emacs Compiler 1. Download and install the GNU Emacs Compiler: 2. Install the GNU Emacs Compiler: Make sure you install the GNU Emacs Compiler for the version of GNU Emacs you are using. 3. Configure the GNU Emacs Compiler 1. Set the Build Path: > Set the "Build Path" to include the path to the GNU Emacs Compiler (the prefix includes any path to a gcc). 2. Configure the GNU Emacs Compiler: > In the "Configure GNU Emacs Compiler..." window type the following arguments: > -j > --no-default-include-path > --no-default-lib-path > --no-default-object > --no-default-target > --prefix=/home/john/r/argus-monitor-2.0.11-build-1304/share/emacs
