Hypoxia-induced selection of chromosomal aberrations in 2D cell cultures. The aim of this study was to verify whether an unselected population of Chinese hamster ovary (CHO) cells will adapt to chronic hypoxia, possibly selecting mutants with specific genetic aberrations. In this study, we performed multiple exposures of cells to hypoxic conditions and analysed the development of cell cycle duration, cell size, and clonogenicity and the frequency of chromosome aberrations in the unselected population of cells. The results showed that the unselected cells displayed significant increase in cell cycle duration and growth rate in response to hypoxic stress.

Additionally, we found that the survival of the unselected cells under chronic hypoxic conditions was lower than that of the parent cells. The frequency of spontaneous chromosome aberrations increased significantly in the unselected cells. These results indicate that the mutant populations can be selected in normoxic cultures, but not when exposed to chronic hypoxia. Our studies of the cellular hypoxia response in the presence of different oxygen levels demonstrate that the responses of the unselected cells differed from those of their parent cells.Arctic Monkeys impresses with new studio album Arctic Monkeys Photo: Press Arctic Monkeys has beaten all their recent competition by winning the 2013 BRIT Award for Best British Album. The trio took the award over last year's winners, Muse, who had already announced that they had spent the last five months playing the album so much that they'd sold out their European tour dates. Arctic Monkeys meanwhile had previously chosen to say that they'd recorded their album largely in secret. However, it seems that the band chose a more open approach for the actual studio process. Held at Bearsden Studios, the group were rehearsing new material on the day of the BRITs. guitarist Jamie Cook said: "It's a place I'm passionate about, so to be there was really exciting." He added: "It's one of the best facilities I've ever used, and I've used a few of them." The
