

## Axle Shafts Manufacturer & Supplier in India

Axle is considered one of the most important parts of the vehicles since these are central shafts, which help connect wheels. Normally, the axles work with the wheels. However, as axles are responsible for controlling power, it is important for the axles to operate that comes in three different types: stub, front, and rear.

Talbros Engineering is a top [Axle Shafts Manufacturer](https://talbrosaxles.com/) & Supplier in India. We manufacture premium quality axle shafts(Light, Medium, and Heavy-duty product range) for Passenger vehicles, Commercial Vehicle, Off-road, and Tractor segments.
