Videos Videos are very much needed when people are using the internet. This is a good way to get information. To search videos, just go to the search bar, and type in whatever you are looking for. When you find a video that you like, you click on the play button which is the square in the middle of the video. If you want to share the video with friends or family, you can just click on the share button which is on the bottom left hand side of the video. More History of Oakland's First Residents June 3, 2011 6:59 AM 639 0 Oakland's first settlers had a unique experience that still exists today – and it could be yours too. The locals first arrived in 1848 and the buildings they brought to the area today were built in the last three decades of the 19th century. While most of Oakland's earliest residents moved to the area because it was cheap, they also came because they wanted to live among nature. The present invention relates to a hand-held paintball marker system. More particularly, the present invention relates to a hand-held paintball marker system, in which the feed tube is integrated with a pressure tube, thereby allowing the marker to be fed ammunition when it is set in a pump-action mode of operation. When shooting a paintball marker, it is necessary to keep the chamber in a primed and ready condition, in order to quickly be able to fire at a moment's notice. A typical means for accomplishing this is to provide a magazine with several rounds of ammunition. The magazine is located in the pistol grip of the marker, and is attached to the body of the marker by means of a spring loaded latch mechanism. When the latch is released, the magazine drops into the bottom of the pistol grip, thereby exposing a removable feed tube, through which the paintballs are fed to the chamber. The paintball marker is held to the user's cheek by means of the use of a spring loaded latch, as mentioned. When a trigger is pulled, the spring loaded latch will open, thereby releasing the magazine, and allowing the ammunition to be fed through the feed tube into the chamber of the paintball marker. While the use of a magazine and feed tube combination is satisfactory in many respects, it does have several disadvantages. Primarily, the use of a magazine attached to the bottom of the pistol grip adds significantly to the overall weight of 2d92ce491b
