Strong File Encryption Decryption Free License Key

What's New in the Strong File Encryption Decryption?

Strong File Encryption/Decryption is a highly secure and reliable application that enables you to encrypt and decrypt files. It is the ideal solution for users who share their computer with multiple users. This utility allows you to protect your files from unauthorized access. It is easy to use:

- Search for a source and a target directory;
- Set a file name for the encryption task and

define the output file type; • Choose the encryption method (strong encryption or data encryption), along with the encryption level and key size; • Generate a private key based on a password phrase and save it to file; • Make Strong File Encryption/Decryption delete the source files when the task is done, to unzip the items before encryption or to zip them afterward; • Execute the encryption task using the command line, the context menu or the icon; • Securely encrypt and decrypt files by using a private key or the password

phrase; • Check the encryption result; • Unsecurely decrypt files to get back the encrypted content; • Unzip and zip files using command-line switches. How to use: 1. Choose a source and a target directory. 2. Set a file name for the encryption task and define the output file type. 3. Choose the encryption method (strong encryption or data encryption), along with the encryption level and key size. 4. Generate a private key based on a password phrase and save it to file. 5. Make Strong File Encryption/Decryption delete the source

files when the task is done. 6. Execute the encryption task using the command line, the context menu or the icon. 7. Securely encrypt and decrypt files by using a private key or the password phrase. 8. Check the encryption result. 9. Unsecurely decrypt files to get back the encrypted content. 10. Unzip and zip files using command-line switches.

Requirements: • Windows: Windows

7/8/8.1/10 • Application installation: Self-

extracting exe file. • System requirements: •

RAM: 256 MB (256 MB RAM

recommended). • CPU: Pentium I, Pentium

II or Athlon with at least 2 GHz or P4-class
2.8 GHz. • Disk space: Minimum free disk
space: 1 MB. • Virtual memory: 4 MB.

Notes: 1. About file types: Please use one of
the following file types: .zip, .rar, .ace, .ace. 2.
About passwords: We suggest that you use
the following passwords: -a password phrase.
-A private key based on the password
phrase. 3. Strong File Encryption/Decryption
does not need Administrator rights. 4. If you
are interested in the source code of the
application, it is available at the

System Requirements For Strong File Encryption Decryption:

Windows Mac Linux Minimum: OS:

Windows 7 Processor: Dual Core Intel or
AMD @ 2.4 GHz Memory: 2 GB RAM

Graphics: 1 GB VRAM DirectX: Version
9.0c Hard Drive: 15 GB available space

Additional Notes: You must install the latest
drivers to play this game. Minimum System

Specifications: Windows: Windows Vista

SP2 or later Mac: OS X 10.6 or later Linux:

Ubuntu 16.04 or
