WinAllIt's a fast, free and easy-to-use backup software utility that saves your files and settings, plus the apps and customizations you've built into your computer, on a single CD or DVD. The program provides a simple, wizard-driven interface with built-in support for error checking and recovery. You can also use it to back up your printers, scanners and other devices. LFBBackupBackup can back up files and folders to

### What's New in the Audio Video IFilter?

Audio Video IFilter uses the AimAtFile Fast File Search or the Windows Desktop Search capabilities of Windows XP to index your entire music and video collection in the local index store of Windows. Windows Desktop Search uses the Windows Search engine for indexing the music and video files. AimAtFile Fast File Search uses the AIFC Search and Media Files application for indexing the music and video files. Features: • Supports audio and video files in MP3, WMA, WMV, AAC, OGG and MP2 format. • Supports ID3 tags in WMA, WMV, MP3 and AAC format. • Supports ASF files in WMA and WMV format. • Supports files from media players and compact disc players. • Supports playback of music and video files with the help of the

---

Windows Media Player. • Supports launching the Windows Media Player after indexing and indexing of the files. • Supports file renaming in Windows Explorer. • Supports searching the indexed files with Windows Desktop Search. • Supports indexing of the files with the Microsoft Indexing Service. • Supports indexing of the files with the Windows Search engine. • Supports the merging of multiple indexing services. • Supports access to the indexing service via the Internet. • Supports filtering of the indexed audio and video files with the Audio Video IFilter. Requirements: • Windows XP or newer. • Microsoft Search 2005 Service Pack 1 or newer. • Microsoft Indexing Service 2005 Service Pack 1 or newer. • Windows Desktop Search 2005 Service Pack 1 or newer. • Microsoft SharePoint Portal Server 2005 Service Pack 1 or newer. Installation: 1. If you want to install Audio Video IFilter on the hard drive of a computer, install Microsoft Search on the hard drive and the Microsoft Search service on the computer. 2. If you want to install Audio Video IFilter on the floppy disk, run the setup.exe file. The setup will check for the presence of the following services: Microsoft Indexing Service 2005 Service Pack 1 or newer and Windows Desktop Search 2005 Service Pack 1 or newer and Microsoft SharePoint Portal Server 2005 Service Pack 1 or newer. If all of the services are present, the installation will begin. Running: 1. Start the Audio Video IFilter with the Start menu or from the Windows desktop and launch the Windows Media Player to play the file. 2. Start the Windows Desktop Search and press Ctrl+T to search. 3. Start the Windows Search, press Ctrl+T to search. Usage: 1. Click the Add button. 2. Open the selected files. The selected files will be indexed for you and displayed in the left part of the Audio Video IFilter window. 3. Check the boxes to exclude the files from the indexing or filtering. 4. Click the button to open the windows for removing unwanted tags.
