What's New In?

Audio Pitch Filter provides an easy way to change the audio pitch or audio tempo when playback video or audio file in any Directshow base application. Here are some key features of "Audio Pitch Filter":

- ☐ Support change the audio pitch or audio tempo in any Directshow base application.
- ☐ Compatible with any programming language that supports Directshow
- ☐ Support double and float input of audio pitch
- ☐ Support double and float input of audio tempo
- ☐ Support fixed and floating input of tempo and pitch
- ☐ Support mix tempo and pitch
- ☐ Support playback with the same tempo or pitch
- ☐

Support playback with different tempo or pitch
[?] Support set audio tempo or audio pitch to a
specific value [?] Support read audio tempo and
audio pitch from a device [?] Support set audio
tempo or audio pitch to a specific device [?]
Support playback with the same tempo or pitch
on specified device [?] Support playback with
different tempo or pitch on specified device [?]
Support mix tempo and pitch on specified
device [?] Support read audio tempo and audio
pitch from a device on specified device [?]
Support CPU calculation or directly draw audio
pitch graph to win32 window [?] Support set
fixed or floating audio pitch [?] Support mix

fixed and float audio pitch [?] Support set fixed or float audio tempo [?] Support mix fixed and float audio tempo [?] Support set floating audio tempo or audio pitch [?] Support mix floating audio tempo and audio pitch [?] Support set floating audio pitch [?] Support mix floating audio pitch and tempo [?] Support draw audio tempo or audio pitch graph to win32 window [?] Support audio tempo control [?] Support audio pitch control [?] Support set audio pitch [?] Support playback with the same tempo or pitch [?] Support playback with different tempo or pitch [?] Support set audio tempo or audio pitch to a specific device [?] Support playback with the

same tempo or pitch on specified device

Support playback with different tempo or pitch on specified device Support mix tempo and pitch on specified device Support read audio tempo and audio pitch from a device on specified device Support

System Requirements:

*The recommended PC System Requirements to play the game are as follow. OS: Windows 7/8.1/10 (64 bit) Processor: 2.6 GHz Processor or faster Memory: 2 GB RAM Graphics: Intel HD4000 or above DirectX: Version 11 Hard Drive: 40 GB Sound Card: Speakers and headset not included. Network: Broadband Internet connection and headset not included.
